Go
For Information Displays

Anthony Starks
@ajstarks

Go is great in the back end

But sometimes it's about the picture

Information Displays

Libraries and Tools

Lots of pictures

Why Go?

Edward Tufte

Display data for precise, effective, quick analysis, Small multiples, Optimizing the data-ink ratio, Visual and beautiful evidence.

Nigel Holmes

Designing for the context: The data visualizer asks: “What’s the data?”, the infographics designer: “What’s the Story?”

An interesting arrangement of text and graphics meant to convey a message.

I hate pushing pixels

computers are so much
better at it

Photo by deborahschillbach

Kelsey Hightower @kelseyhightower · Apr 10

Gophers will do anything to avoid writing Javascript.

> **Ben Johnson** @benbjohnson
> I wrote a full PhantomJS client in Go over the weekend. Still needs a higher level testing library though. github.com/benbjohnson/ph…

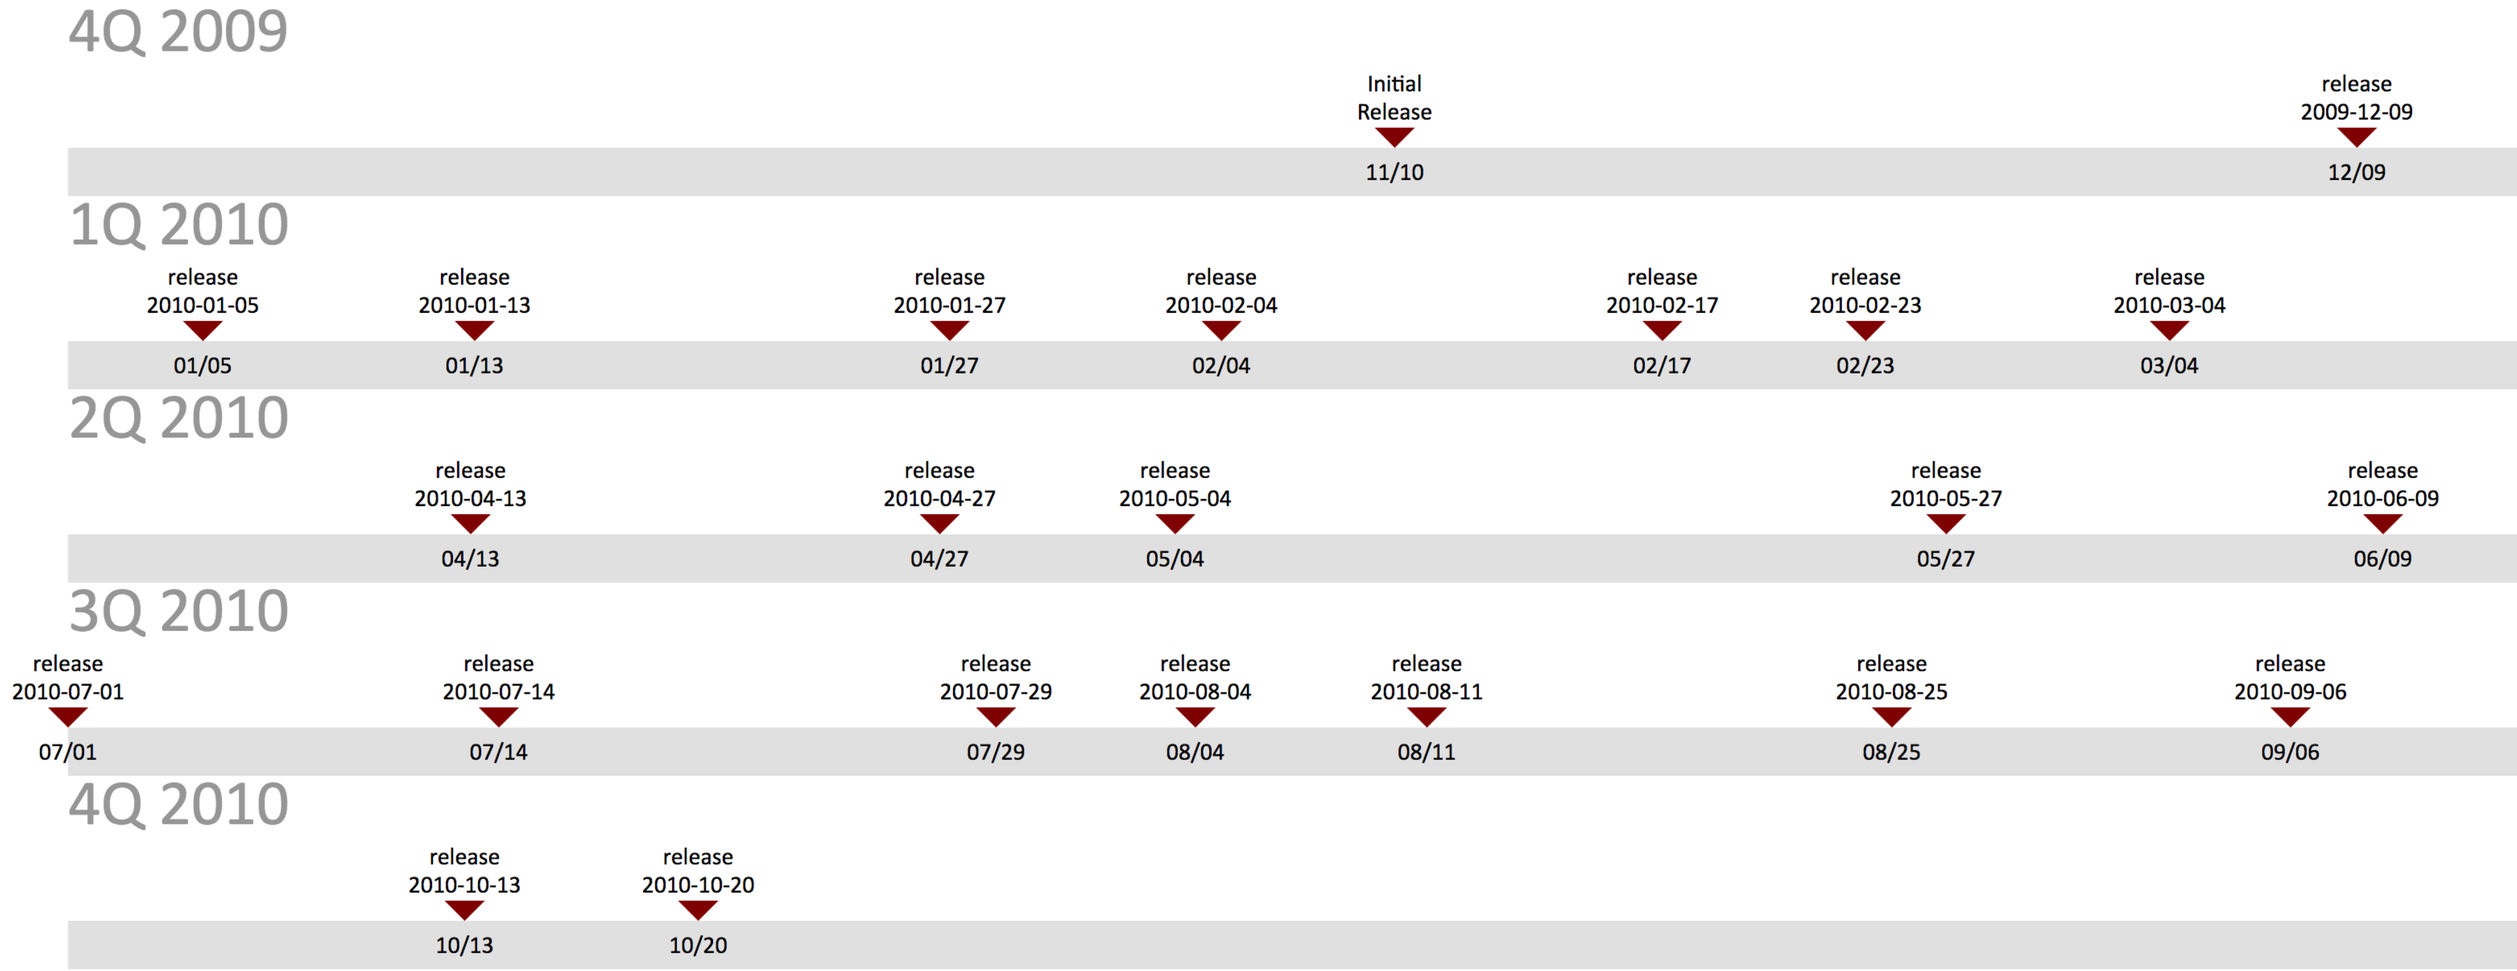
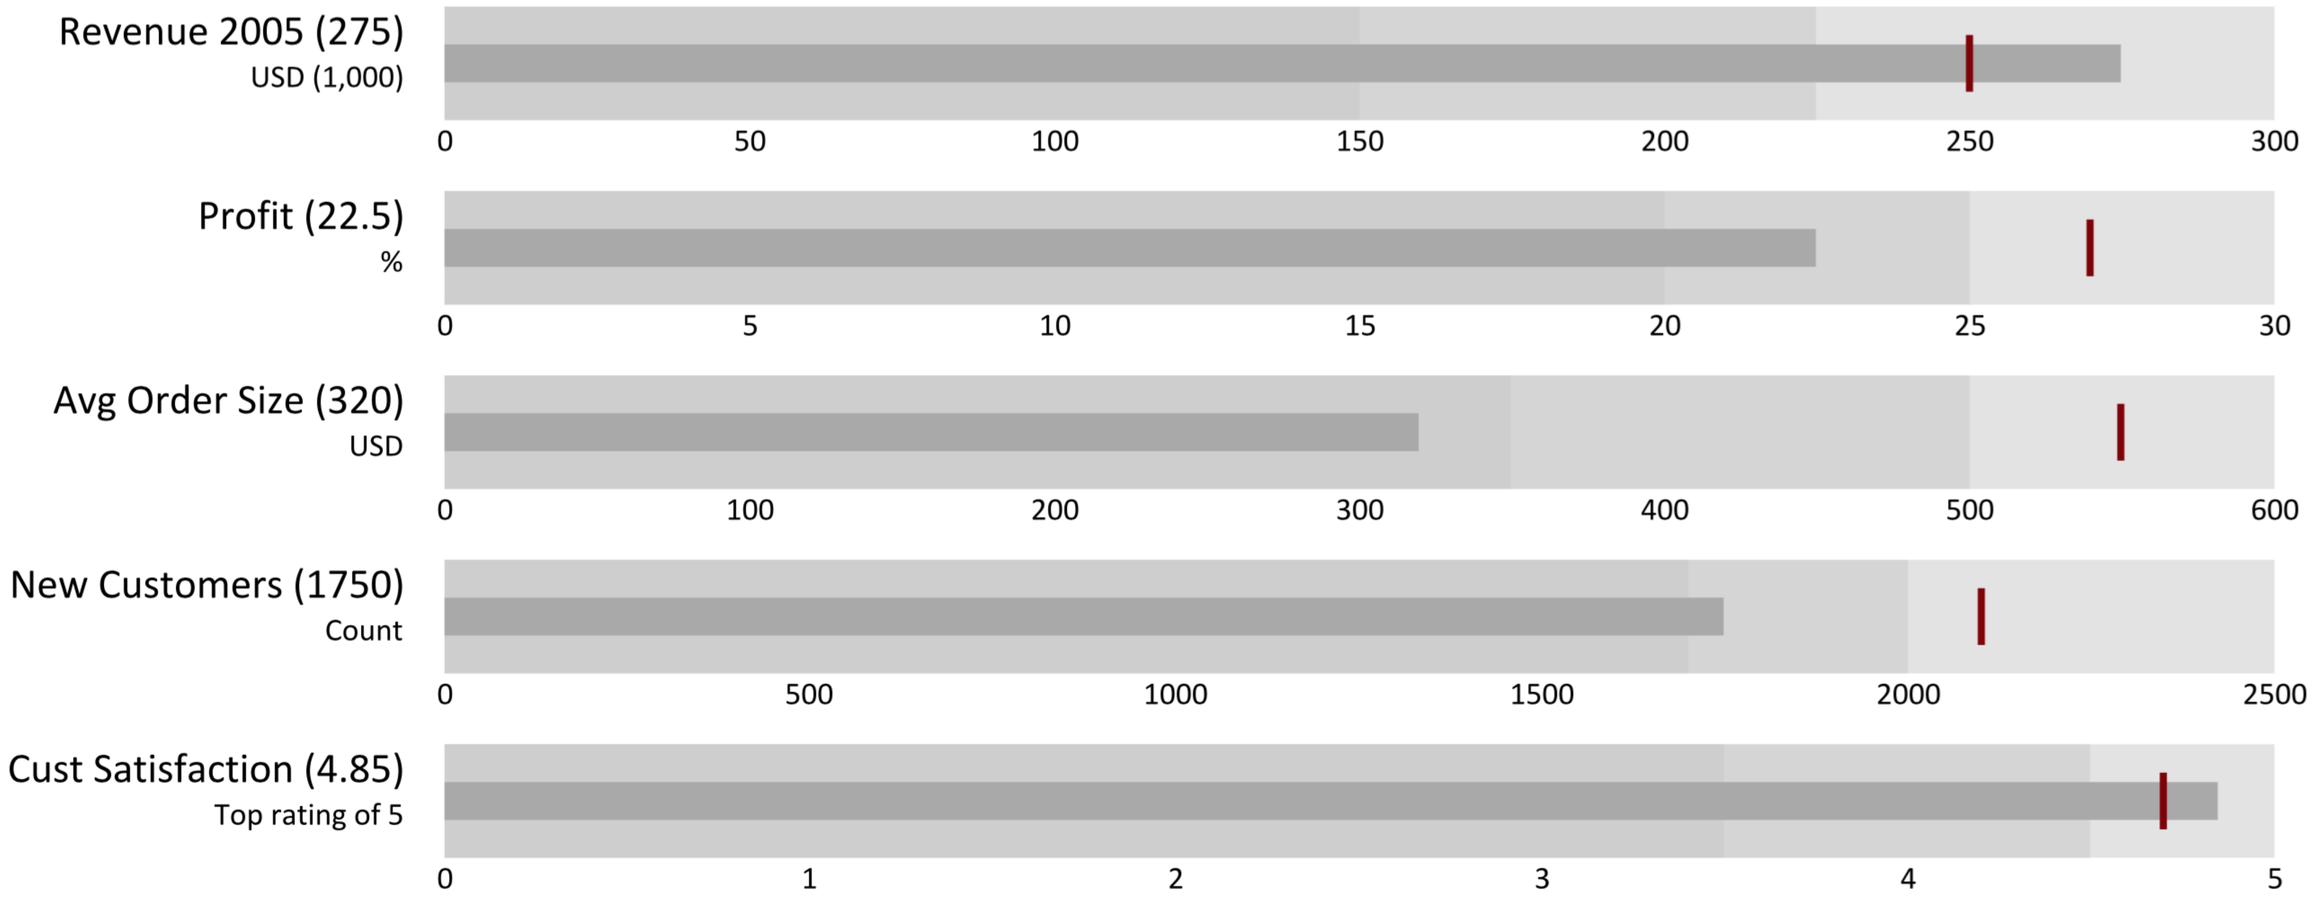
Go Programming Language Release History





Sample Bullet Graph

The bullet graph features a single, primary measure (for example, current year-to-date revenue) compares that measure to one or more other measures to enrich its meaning, for example, compared to a target), and displays it in the context of qualitative ranges of performance, such as poor, satisfactory, and good.

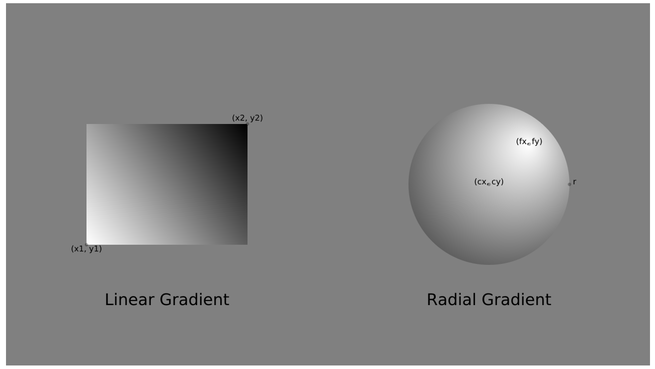
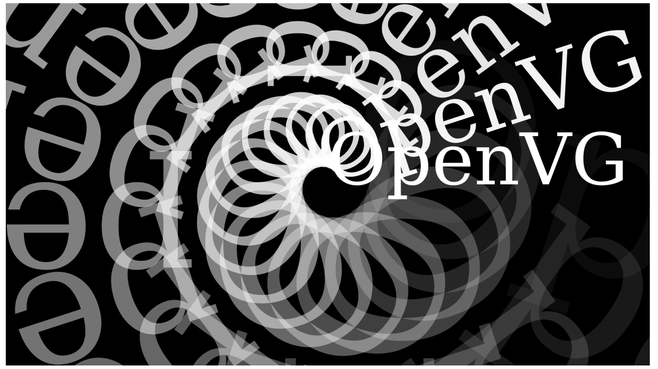
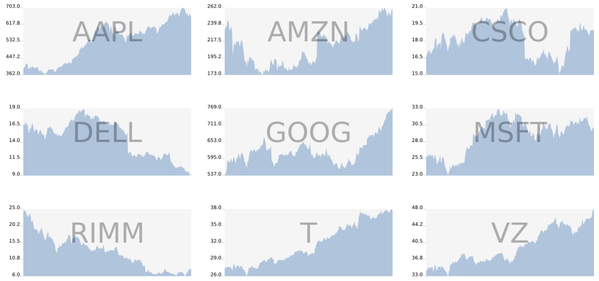
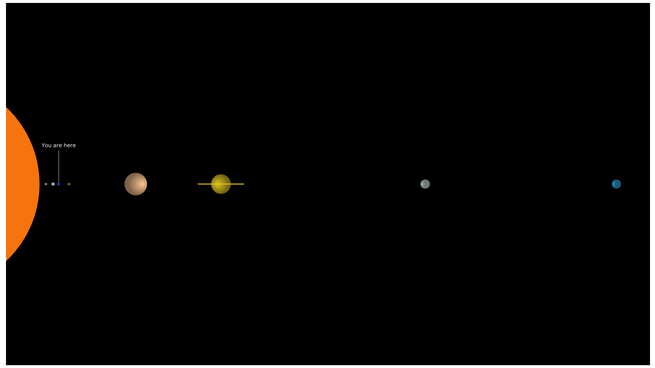
OpenVG on the Raspberry Pi









Why I use Go

Anthony Starks

@ajstarks
ajstarks@gmail.com

```
package main
import "fmt"

func main() {
    fmt.Println("hello, world")
}
```

This is the traditional hello, world program.
It's six lines long, and imports the fmt package,
leading some to be suprised at the size of the resulting binary.

```
package main

import (
    "bufio"
    "github.com/ajstarks/openvg"
    "os"
)

func main() {
    width, height := openvg.Init()

    w2 := openvg.VGfloat(width / 2)
    h2 := openvg.VGfloat(height / 2)
    w := openvg.VGfloat(width)

    openvg.Start(width, height)                  // Start the picture
    openvg.BackgroundColor("black")              // Black background
    openvg.FillRGB(44, 100, 232, 1)              // Big blue marble
    openvg.Circle(w2, 0, w)                      // The "world"
    openvg.FillColor("white")                    // White text
    openvg.TextMid(w2, h2, "hello, world", "serif", width/10) // Greetings
    openvg.End()                                 // End the picture
    bufio.NewReader(os.Stdin).ReadBytes('\n') // Pause until [RETURN]
    openvg.Finish()                              // Graphics cleanup
}
```

Genesis 3

Now the serpent was more subtil than any beast
of the field which the LORD God had made. And
he said unto the woman, Yea, hath God said,
Ye shall not eat of every tree of the garden? And
the woman said unto the serpent, We may eat
of the fruit of the trees of the garden: But of the
fruit of the tree which is in the midst of the garden,
God hath said, Ye shall not eat of it, neither shall
ye touch it, lest ye die. And the serpent said unto
the woman, Ye shall not surely die: For God doth
know that in the day ye eat thereof, then your
eyes shall be opened, and ye shall be as gods,
knowing good and evil.

Samir Nagheenanajar

ROLE Design and UX Head
LOCATION Bridgewater, NJ

“I’m all about applying great design to all our products. We should provide a good experience in everything we do.”

GOALS/LIKES

- To have simple intuitive tools
- Be open to new tools and methods
- To apply good design across the whole environment

FRUSTRATIONS

- One size fits all mentality
- IT imposing tools with no real input
- Not designing for multiple form-factors and use-cases

PERSONALITY

Extravert — Introvert

Sensing — Intuition

Thinking — Feeling

Judging — Percieving

TECHNOLOGY

IT and Internet

Software

SUMMARY

Technically savvy, and demanding, Samir appreciates the value of good design, and is frustrated when the collaboration products fall short in this regard. On the other hand, he will actively promote tools that are designed well, and is very willing to share his knowledge and insights. Further, Samir will be a strong advocate for new effective ways of working togther.

RELATED QUESTIONS

- Why do we use outdated products?
- What are the cultural aspects of collaboration?
- When will design be included in our requirements?
- Is the concept of the Intranet outdated?
- What is the cost to start over with new technologies?

So, the next time you're about to make a subclass, think hard and ask yourself

what would Go do

Andrew Mackenzie-Ross

go

build	compile packages and dependencies
clean	remove object files
doc	show documentation for package or symbol
env	print Go environment information
fix	run go tool fix on packages
fmt	run gofmt on package sources
generate	generate Go files by processing source
get	download and install packages and dependencies
install	compile and install packages and dependencies
list	list packages
run	compile and run Go program
test	test packages
tool	run specified go tool
version	print Go version
vet	run go tool vet on packages

Go Proverbs

Don’t communicate by sharing memory, share memory by communicating.

Concurrency is not parallelism.

Channels orchestrate; mutexes serialize.

The bigger the interface, the weaker the abstraction.

Make the zero value useful.

interface{} says nothing.

Gofmt’s style is no one’s favorite, yet gofmt is everyone’s favorite.

A little copying is better than a little dependency.

Syscall must always be guarded with build tags.

Cgo must always be guarded with build tags.

Cgo is not Go.

With the unsafe package there are no guarantees.

Clear is better than clever.

Reflection is never clear.

Errors are values.

Don’t just check errors, handle them gracefully.

Design the architecture, name the components, document the details.

Documentation is for users.

Don’t panic.

Documentation
is for users.

Documentation
is for users.

Don’t panic.

Make the zero value useful.

The new masters of our universe are people who are essentially only half-educated.

They have had no exposure to the humanities or the social sciences, the academic disciplines that aim to provide some understanding of how society works, of history and of the roles that beliefs, philosophies, laws, norms, religion and customs play in the evolution of human culture

data | dchart | pdf

Chart Types

`-bar`	bar chart (default true)
`-wbar`	word bar chart (default false)
`-hbar`	horizontal bar chart (default false)
`-scatter`	scatter chart (default false)
`-dot`	dot plot (default false)
`-line`	line chart (default false)
`-vol`	volume plot (default false)
`-pgrid`	proportional grid (default false)
`-pmap`	proportional map (default false)
`-donut`	donut chart (default false)

Chart Elements

`-grid`	show gridlines on the y axis (default false)
`-val`	show values (default true)
`-valpos`	value position (t=top, b=bottom, m=middle) (default "t")
`-yaxis`	show a y axis (default true)
`-yrange`	specify the y axis labels (min,max,step)
`-fulldeck`	generate full deck markup (default true)
`-title`	show the title (default true)
`-chartitle`	specify the title (overiding title in the data)
`-xlabel`	x axis label interval (default 1, 0 to supress all labels)
`-xlast`	show the last x label
`-hline`	horizontal line at value with label

Position and Scaling

`-top`	top of the plot (default 80)
`-bottom`	bottom of the plot (default 30)
`-left`	left margin (default 20)
`-right`	right margin (default 80)
`-min`	set the minimum value
`-max`	set the maximum value
`-dmin`	data minimum (default false, min=0)

CSV

`-csv`	read CSV files (default false)
`-csvcol`	specify the columns to use for label,value

Measures and Attributes

`-barwidth`	barwidth (default computed from data size)
`-ls`	linespacing (default 2.4)
`-textsize`	text size (default 1.5)
`-color`	data color (default "lightsteelblue")
`-vcolor`	value color (default "rgb(127,0,0)")
`-datafmt`	data format for values (default "%.1f")
`-psize`	diameter of the donut (default 30)
`-pwidth`	width of the donut or proportional map (default 3)
